Nov 2019 - Feb 2020

Back End Developer • PT Stockbit

Responsible for writing server-side web application logic. develop back-end components, connect the application with the other (often third-party) web services and support the front-end developers by integrating their work with the application.

Apr 2020 - May 2021

Software Engineer • Apple Inc.

Assisted my team to develop the prototype of the concept for financial planning and analytics. Conducted research into new technology developed by the company to build the prototype. Tested the function, performance and possibility of the prototype with a real use case in business. Helped develop software that parses logs to analyze users' behavior of RapidResponse. Extended the feature of my employer's software to explore potential benefits for RapidResponse.
